Archetype	Datasets	Mean score	Defining signals	Common ACUs	Typical construction	Reusability	Examples
Reusable benchmarks	652	77.6	released, licensed	scale/coverage, annotation/protocol	expert/curated	release 100.0%, license 100.0%	MultiNativQA; Code-Switching Red-Teaming (CSRT); Massive Multilingual Holistic Bias
LLM-generated datasets	3976	79.2	LLM use, released, clear prior lineage, high score	scale/coverage, annotation/protocol	LLM-assisted	release 80.5%, license 3.5%	ECom-Bench; TimeTravel; RoCode
Domain expert resources	4169	78.7	released, high score	scale/coverage, annotation/protocol	expert/curated	release 82.0%, license 8.3%	Comprehensive Machine Translation benchmark; CSS-14-Tasks-Corpus; LAR-ECHR
Scale-driven corpora	1004	76.7	mixed signals	scale/coverage, data/source	expert/curated	release 72.8%, license 9.0%	TIC-CommonCrawl; SOCIAL-FINANCE-QA; Dataset of quotation attribution in German news articles
Dataset extensions	621	73.0	mixed signals	data/source, task/domain	expert/curated	release 73.9%, license 5.5%	AdminSet-NER; Specialised foreign word test set; HotpotQA (distractor setting)
